

*Presenting*

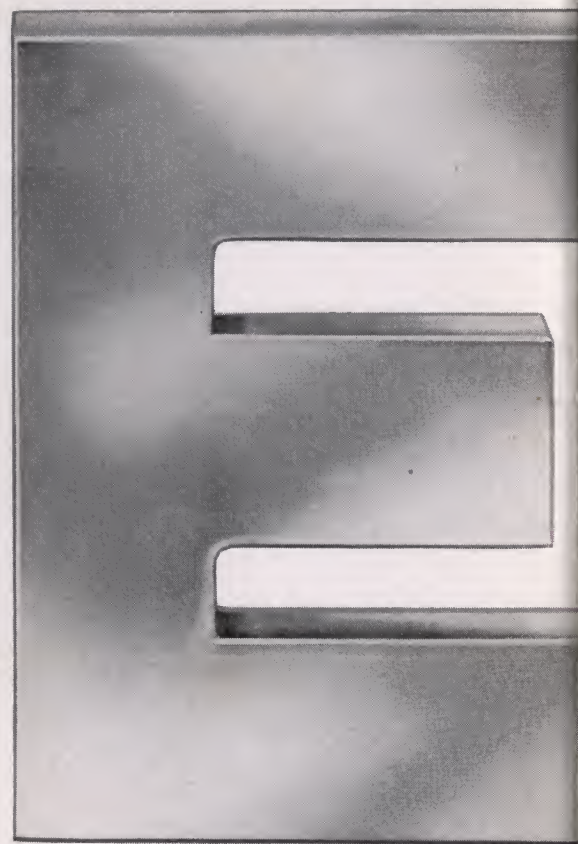

Created by master designers—  
graceful pleasing lines with unex-  
celled sturdy, massive appear-  
ance. The bold stroke and great-  
er depth of Scott Letters gives a  
NEW great display power not  
found in any other letters. See  
inside pages for details.

**NEW, SENSATIONALLY POWERFUL  
CAST ALUMINUM DISPLAY LETTER  
FOR PERMANENT SIGNS**

*Scott*

STYLE: Modified Roman illustrated in solid color finish.

STYLE: Bold Gothic illustrated in POLYSHEEN finish.

## *Sizes*

Both styles of letter, Modified Roman and Bold Gothic, are available in the following sizes: 6" high (1½" deep), 12" high (3" deep), 18" high (3½" deep), 24" high (4" deep), 36" high (5" deep). Complete lines of letters, numerals and punctuations in both styles and all sizes.

## *Color and*

# *Exclusive Polysheen Finish*

POLYSHEEN bright silver finish.

STYLE: Modified Roman illustrated in solid color finish.

## *Finish*

our exclusive POLYSHEEN  
ning POLYSHEEN gold fin-  
esired, with or without the  
n. All letters are furnished  
o set up.

## *Accessories*

All mounting accessories, including our four-way adapt-  
able, stainless steel mounting bracket, brass hex cap  
screws, and brass washers are rustproof and are supplied  
with the letters without extra cost.

## *Immediate Delivery*

The POLYSHEEN finish gives a scintillating, flashing, highly reflective surface to Scott Letters. It is impossible to picture the high-lustre silver or the rich mellow gold of letters with the exclusive Polysheen finish. POLYSHEEN-surfaced letters must be seen to be appreciated. In beauty and attractiveness they have no equal.

# STRONG, HUSKY RUGGED LETTERS

This rear view shows the strong rugged construction of Scott Letters. Note the thickness of the walls of the letter.

## DEPTH DISTINCTION DURABILITY

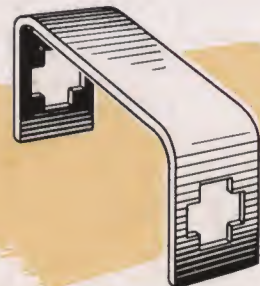

In no other sign letter will you find the generous depth of Scott Letters—no other letter has the style-distinction, outstanding display power and structural durability of Scott Letters.

## VERSATILITY

Scott Letters can be mounted directly on a wall-surface—or they can be mounted on a metal, wood or masonite background, assembled into a complete sign—or they can be used as free-standing letters bolted from the bottom on a flat ledge or surface. They are suitable for use non-illuminated—or with neon lighting on face or sides—or lighted from the rear with neon or lamp bulbs for silhouette effect.

## THE FOUR-WAY ADAPTABLE MOUNTING BRACKET

This illustration shows the adaptable mounting bracket supplied for Scott Letters. Notice the extra convenience, the added adaptability of this bracket. The construction provides  $\frac{1}{4}$ " extra space up and down, and  $\frac{1}{4}$ " extra space from side to side, for the shaft of the bolt. This extra play in the mounting bracket enables you to place letters in correct alignment and with proper spacing even though bolt-holes in the wall mounting surface may be a little out of position up and down or from side to side.
